THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

DETAILED ACTION

Allowable Subject Matter

Claims 10-29 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record, i.e., references Gudmundson et al. (US Patent No. 5,790,516), Ramesh (US Patent No. 6,463,105), Heinonen et al. (US Patent No. 6,700,866) and Muri (US Patent No. 4,513,385) teach and suggest the followings:

Gudmundson teaches pulse shaping for data transmission in an OFDM system that lessens the effects of time dispersion and Doppler spread intersymbol interference ISI on received OFDM signals and the system also reduces out of band interference in an OFDM system. A pulse shaping function is a raised cosine pulse over a period T for determines the amount of reduction of ISI. The pulseshaping function is used with other mathematical algorithms such as filters Hanning function, Fast Fourier Transform function, time discrete pulse shaping function and combiner circuitry in effort to reducing intersymbol interference ISI between data symbols that are modulated onto a plurality of subcarriers comprising an OFDM data signal (see Gudmundson, column 4 lines 60-67, column 5 lines 1-67, column 6 lines 1-55, col 9 lines 5-35).

Ramesh teaches method and system for estimating of a carrier to interference ratio of a wireless communication channel by calculating the ratio (a carrier to interference ratio) of a channel based on variations in the channel response characteristics over an estimated time period. A signal received through a channel over a time period that associated with a plurality of symbol estimates, the plurality of the symbol estimates is compared to a plurality of associated expected symbols in order to generate a channel estimation which accounts for interference signal strength for the channel over the period of time. The generated interference signal strengths may be accumulated and an average interference signal strength for a channel may be generated. Some system pieces such as interference measurement circuits, A/D converters, modulation/demodulation are used for to provide calculation of the signal to interference ration of a channel in order to generate the interference signal strength for

in both downlinks and uplinks for deriving a channel estimate (see Ramesh, the abstract, col 3 lines 20-67, col 7 lines 5-67, col 8 lines 1-20).

Heinonen teaches method and system for use in obtaining frequency synchronization in an OFDM system. The frequency synchronization relates to the use of a coarse frequency correction process, a fine frequency correction process, and an overarching iterative process (see Heinonen, col 2 lines 35-67). Received frequencies are adjusted so that the pilot tone reference to the received frequencies are within a predetermined range. Pilot tones corresponding to frequency bands are utilized for frequency synchronization process, adjacent pilot tones are separated by a frequency gap between adjacent frequency bands, the coarse frequency correction process is for frequency alignment, the alignment range of frequencies include a lower edge portion of lower adjacent frequencies, similarly, for the upper portion of upper adjacent frequency band and the guard between the portions (see Heinonen, col 5 lines 25-67, col 6 lines 1-25).

Muri teaches method and system for suppressing sidelobe response in a digital sampled system and teaches digital filters such as finite impulse response in digital signal processing to observe the samples of unknown signals and using desired filters such as Barlett, Hamming, Blackman and Kaiser windows to weight sample values to substantially reduce the amplitudes of undesired side lobe responses to the main lobe response (see Muri, col 1 lines 15-67, col 2 lines 1-30).

However, the combination of the prior art of record neither teach, suggest nor disclose the unique claimed features, i.e., performing an adaptive pre-emphasis of a send signal for only a part of the carrier frequencies of the at least one sub-carrier band thereby reducing inter channel interference caused by at least two subscribers, wherein the carrier frequencies which are subject to the adaptive pre-emphasis are only frequencies located at an edge of the at least one sub-carrier band.

Therefore claims 10-20 are deemed allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
